Management Commentary

Kingstone's Chairman and CEO, Barry Goldstein, commented, "We achieved an overall increase of 14.4% in direct written premiums during the quarter, which after factoring out the run-off of our commercial auto book amounts to an increase of 21.0% in

our continuing lines of business. Net premiums earned improved 123.1% and 39.8% in our personal and commercial lines, respectively. We were also pleased to secure favorable reinsurance terms for July 1, 2015 renewals, which is a continuation of our strategy to protect our balance sheet and reduce Kingstone's reliance on quota share, allowing us to retain more of the profitable business we write. As a result of a larger base of premiums from our gradual reduction in quota share reinsurance, Kingstone reported improved year-over-year net income and Earnings Per Share."

"Effective July 1, 2015, the Company entered into a new quota share treaty covering its Personal Lines business. The new treaty further reduced the quota share to 40%, down from the 55% ceded during the prior treaty and from 75% in prior years. In addition to our retaining more of the business we originate, we changed our treaty terms from a "gross treaty," which included a proportional share of our catastrophe coverage needs, to a treaty exclusive of catastrophe coverage or a "net" treaty. As a result, we directly purchased all of our catastrophe reinsurance, protecting the Company from a 1-in-145 year storm for a total of \$176,000,000 of coverage. We purchased reinstatement premium protection on the \$16,000,000 first layer. In the event that our winter storm losses exceed \$4,000,000 (same as last year in spite of our growth), or another type of catastrophe event such as a hurricane, Kingstone has effectively prepaid the reinstatement premium costs on the most costly layer of coverage. Kingstone will now retain \$2,400,000 of losses, or 60% of the overall \$4,000,000 retention. Under the new net treaty's terms, the incremental decline in ceding commission income triggered by a catastrophe should amount to less than \$1,000,000. Compare this to the impact that Superstorm Sandy had on commission income, when our commission income declined by approximately \$3,766,000."

2015 Second Quarter and First Half Financial Review

Net Income:

Net income increased 75.6% to \$2.4 million during the three month period ended June 30, 2015, compared to net income of \$1.4 million in the prior-year period. The increase can be attributed to a 69.0% increase in net premiums earned as a result of changes in quota share reinsurance, increased net investment income, and a decrease in the net loss ratio, partially offset by a higher net underwriting expense ratio. For the six months ended June 30, 2015, net income increased to \$2.8 million from \$1.7 million in the prior year period.

Earnings per share ("EPS"):

Kingstone reported EPS of \$0.32 per diluted share for the three months ended June 30, 2015, compared to \$0.18 per diluted share for the three months ended June 30, 2014. EPS for the three month period ended June 30, 2015 was based on 7.4 million diluted weighted average shares outstanding. For the six months ended June 30, 2015, EPS was \$0.38 per diluted share compared to \$0.23 in the prior year period.

Direct Written Premiums⁽¹⁾, Net Written Premiums⁽¹⁾ and Net Premiums Earned:

Direct written premiums⁽¹⁾ for the second quarter of 2015 were \$23.2 million, an increase of 14.4% from \$20.3 million in the prior year period. The increase is attributable to an 18% increase in the total number of policies in-force as of June 30, 2015 from June 30, 2014. For the six months ended June 30, 2015, direct written premiums increased 16.6% to \$42.7 million, compared to \$36.6 million in the prior year period.

The Company's growth rate for its continuing lines of business was 21.0% during the period. The Company began to non-renew its existing commercial auto policies beginning with those effective May 1, 2015. In the second quarter of 2015, commercial auto premiums written declined to \$44,517, compared to \$1.1 million in the second quarter of 2014. As of June 30, 2015, commercial auto represented less than 1% of total policies in force.

Net written premiums⁽¹⁾ increased 54.5% to \$13.1 million during the three month period ended June 30, 2015 from \$8.5 million in the prior year period. For the six months ended June 30, 2015, net written premiums increased 59.2% to \$24.0 million, compared to \$15.1 million in the prior year period.

Net premiums earned for second quarter ended June 30, 2015 increased 69.0% to \$10.9 million, compared to \$6.4 million in the second quarter ended June 30, 2014. The increase was primarily due to the Company's continuing growth along with it retaining a higher percentage of its premiums due to the reduction of the quota share percentage in its personal lines quota share treaty and the elimination of the commercial lines treaty on July 1, 2014. For the six months ended June 30, 2015, net premiums earned increased 72.0% to \$21.3 million from \$12.4 million in the prior year period.

Net Loss Ratio:

The net loss ratio during the three month period ended June 30, 2015 was 43.9% compared to 46.8% in the three month period ended June 30, 2014. For the six months ended June 30, 2015, the Company's net loss ratio was 55.7%, compared to 59.3% in the prior year period.

Net Underwriting Expense Ratio:

Kingstone's net underwriting expense ratio was 24.6% during the second quarter ended June 30, 2015, compared to 24.0% in the prior year period. The increase was due to the individual components of provisional ceding commission revenue, commission expense and other underwriting expenses and their relation to the increase in net premiums earned as a result of the additional

retention resulting from the Cut-offs to our quota share treaties on July 1, 2014. For the six months ended June 30, 2015, the Company's net underwriting expense ratio increased to 27.2% from 23.3% in the prior year period.

Net Combined Ratio:

Kingstone's net combined ratio was 68.5% for the three month period ended June 30, 2015, compared to 70.8% for the prior year period. For the six months ended June 30, 2015, the Company's net combined ratio was 82.9%, compared to 82.6% in the prior year period.

(1) These measures are not based on GAAP and are defined and reconciled to the most directly comparable GAAP measures in "Information Regarding Non-GAAP Measures."

Balance Sheet / Investment Portfolio

Kingstone's cash and investment holdings were \$75.2 million at June 30, 2015, compared to \$74.2 million at December 31, 2014. The Company's investment holdings are comprised primarily of investment grade corporate and municipal securities, with fixed income investments representing approximately 87.0% of total investments at June 30, 2015, and 87.5% at December 31, 2014. The Company's effective duration on its fixed-income portfolio is 5.4 years.

Net investment income increased 38.5% to \$0.6 million for the second quarter of 2015 from \$0.5 million in the prior year period, largely due to an increase in invested assets. The taxable equivalent investment yield, excluding cash, was 4.85% at June 30, 2015 and 4.86% at June 30, 2014.

Accumulated Other Comprehensive Income (AOCI) net of tax

During the quarter ended June 30, 2015 AOCI declined by \$868,000 to \$588,000. For the six months ended June 30, 2015, AOCI declined by \$358,000 to \$588,000.

Book Value

The Company's book value per share at June 30, 2015 was \$5.73, an increase of 2.9% compared to \$5.57 at March 31, 2015, and up 10.6% from \$5.18 at June 30, 2014.

Definitions of Non-GAAP Measures

Direct written premiums- represents the total premiums charged on policies issued by the Company during the respective fiscal period.

Net written premiums- represents direct written premiums less premiums ceded to reinsurers.

Net premiums earned - is the GAAP measure most closely comparable to direct written premiums and net written premiums. Management uses direct written premiums and net written premiums, along with other measurers, to gauge the Company's performance and evaluate results. Direct written premiums and net written premiums are provided as supplemental information,

are not a substitute for net premiums earned and do not reflect the Company's net premiums earned.

The table below details the direct written premiums, net written premiums, and net premiums earned for the periods indicated:

Net operating income - is net income exclusive of realized investment gains, net of tax. Net income is the GAAP measure most closely comparable to net operating income. Management uses net operating income, along with other measures, to gauge the Company's performance and evaluate results, which can be skewed when including realized investment gains, which may vary significantly between periods. Net operating income is provided as supplemental information, is not a substitute for net income and does not reflect the Company's overall profitability.

Net combined ratio excluding the effect of catastrophes - is a non-GAAP ratio, which is computed as the difference between GAAP net combined ratio and the effect of catastrophes on the net combined ratio. We believe that this ratio is useful to investors and it is used by management to reveal the trends in our business that may be obscured by catastrophe losses. Catastrophe

losses cause our loss trends to vary significantly between periods as a result of their incidence of occurrence and magnitude, and can have a significant impact on the net combined ratio. We believe it is useful for investors to evaluate this component separately and in the aggregate when reviewing our underwriting performance. We also provide it to facilitate a comparison to our outlook on the net combined ratio excluding the effect of catastrophes. The most directly comparable GAAP measure is the net combined ratio. The net combined ratio excluding the effect of catastrophes should not be considered a substitute for the net combined ratio and does not reflect the Company's overall profitability.

The following table reconciles the net combined ratio excluding the effects of catastrophes to the net combined ratio:
